I happened to be looking for a new point & click/adventure game and happened to come across this little gem. It is a little charming Indie game that utilizes real locations in Buenos Aires and combines with both satirical and factual interactions with one of Argentina's most prominent Tango musician. Your adventure begins in a prison, playing a fictional version of Carlos Gardel. The scenes that follow all seem to be based around lyrics from his many songs, somewhat, and one can base this on the fact that one of his songs is actually titled "Prisionero" (Prisoner). Now on any other day, I may have bypassed it for a much longer or detailed game offered in the store. However, for me aside from it fitting my chosen genre, it holds sentimental value. I am from Buenos Aires, Argentina, and I have been lucky to find some hidden gems in the store that in some way represent my place of birth. Tango: The Adventure Game happened to be one of those games, with a little addition, the inclusion of Carlos Gardel. My grandfather was a huge fan of his work and would listen to his music for hours. This game brought back some great memories of mi abuelo as well as providing me with a few hours of pleasantly enjoyed game time. Although somewhat short in length, it makes up with its entertaining dialogue and interesting little puzzles. I look forward to its sequel, if one is to be considered.
